The AutoCAD software package can be separated into a main suite of AutoCAD programs (including 2D and 3D) and AutoCAD Rulers, which are related, but separate, programs providing a set of tools for creating basic shape such as circles, ovals, squares, and rectangles. An integrated drawing package which includes Revit functionality. The application allows the user to work with various drawing types such as vector, raster and text, as well as three-dimensional solid, surface, and wireframe objects. It can be

run on most Windows and Macintosh computers. AutoCAD is capable of automatically generating many types of documents, including hard-copy prints, dxf, dwg, and pdf (portable document format). AutoCAD software offers a number of tools to aid the user in the creation of drawings. Commonly-used tools include object recognition and digitizing, intelligent drawing guides, text, and color and linetype. AutoCAD software is available as a desktop app, as mobile apps on iPhone and iPad, and on web for PC, Mac, Linux, Android and iOS. History AutoCAD's 1.0 software release

was in January 1983. The first three models of AutoCAD were the LC, MLC, and LMC; a personal version of the software named AcDbXpress was released around the same time. It was followed by a version named AcDbVesion, which was later replaced by AcDbEpress in 1987. (Epress was AutoCAD's first "roadmap" release.) Before the release of AutoCAD version 2.0 (1992), the software was sold as AutoCAD 2000, the fifth generation of AutoCAD. About 75,000 copies of AutoCAD 2000 were sold. In 1994, with the release of AutoCAD version 3, AcDbEpress was replaced with AutoCAD V3, which

allowed users to work with AutoCAD files that were open in earlier versions of the program. AutoCAD V4 was introduced in 1996, with the release of AutoCAD's first product developed using the Application Program Interface (API). V4 was the last software release developed using the 16-bit API. AutoCAD V5 was released in 1998 and marked the first major update to the application since 1996. The release of AutoCAD V5.1 in 1999 introduced full-page continuous trim, the ability to

InfoPath Forms Services InfoPath Forms Services is a component of InfoPath for the Windows SharePoint Services (a.k.a. SharePoint) from Microsoft. Autodesk InfoPath is an add-on to the product Autodesk DWG Viewer that allows users to fill out InfoPath forms and publish them on the web. There is also a component of InfoPath, called Autodesk Forms Builder, that allows a user to create InfoPath forms. In the 2010 version, InfoPath Forms Services is integrated into SharePoint. In this version, InfoPath Forms Services enables forms to be published directly from SharePoint. In 2010,

InfoPath Forms Services allows Forms, Lists and Views to be created using the Office object model (COM). In addition, SharePoint sites can be created for each form and lists created using InfoPath. The forms can be hosted on SharePoint sites or a web server. The Forms Library feature of InfoPath Forms Services allows forms to be viewed, modified and saved. A list of the forms in the library can be accessed through a SharePoint list, and each form can have some basic information, such as title and description. The Forms Library can also contain a number of views. The Views Library is a way to define how the information

in the Forms Library is presented to the user. For example, it can be organized into various views, such as by section or user role. Views can be created using the standard Views forms. There are also a few special views available in this component. In addition, InfoPath Forms Services can be used to create data-driven forms that include code (VBA) to connect to a data source (such as Excel), a table or SQL database. Features include: Forms that can be hosted on a SharePoint site Forms can be viewed, modified, and saved Forms can be connected to a data source View forms (lists) created in InfoPath View forms (lists) can be

organized into views View forms (lists) can be customized View forms (lists) can include code (VBA) to connect to a data source (such as Excel, SQL, Active Directory, etc.) Form, views (lists) can be shared with other users Code (VBA) to connect to a data source (such as Excel, SQL, Active Directory, etc.) Supports standard Forms and Views Custom fields that can be ca3bfb1094
